Tian Cao

100 Rock Haven Road
APT E208
Carrboro, NC 27510

(919) 699-9542
tiancao@cs.unc.edu
tiancao.me

Interests

Computer Vision, Machine Learning, Image Analysis

Education

University of North Carolina at Chapel Hill, Chapel Hill, NC — 12/2015(expected)
Ph.D. candidate in Computer Science

Sichuan University, Chengdu, Sichuan, China — 06/2010
M.S. in Computer Science

Sichuan University, Chengdu, Sichuan, China — 05/2007
B.E. in Computer Science

Skills

C/C++, Java, Matlab, Python, Bash, CUDA, OPENCV

Experience

Research Project, UNC Chapel Hill, Chapel Hill, NC — 09/2014-present
Image Annotation using Deep Learning Representations
- Developed automatic image annotation with Convolutional Neural Network(CNN) features.
- Jointly modeling the image features and word features and tested on multiple dataset.
- Implemented in matlab, C++ and Caffe.

Research Project, UNC Chapel Hill, Chapel Hill, NC — 09/2010-present
Coupled Dictionary Learning for Image Analysis
- Developed coupled dictionary learning methods for image analysis.
- Learning coupled dictionaries based on sparse coding, and applied the learned dictionary to multi-modal image analysis problems.
- Implemented in matlab and C++.

Research Intern, IBM Almaden Research Center, San Jose, CA — 05/2014-08/2014
Multi-atlas based Image Segmentation
- Investigated methods of learning from ambiguous labels.
- Investigated atlas based image segmentation methods with different local features and classifiers.
- Implemented atlas based image segmentation framework in Java and matlab.

Research Intern, Siemens Corporate Research, Princeton, NJ — 05/2012-08/2012
Real-time Object Detection in Ultrasound Videos
- Developed and implemented a needle detection method for ultrasound videos.
- Incorporated with different features and hough transform to vote the needle segment.
- Implemented a 3D steerable filtering method to incorporate spatial and temporal information for needle detection in C++.

Research Project, Chinese Academy of Sciences, Shenzhen, China — 09/2009-03/2010
Energy based Crowd Motion Analysis
- Developed an energy based crowd motion analysis algorithm based on mutual information.
- Applied the algorithm to detect the crowd abnormal behaviors.
- Implemented in OPENCV and C++.

Research Project, Sichuan University, Chengdu, China — 01/2008-09/2009
Super-resolution for Ultrasound Speckle Reduction
- Developed a fast and robust super-resolution method for intima reconstruction in ultrasound.
- Applied anisotropic diffusion to reduce speckle with edge enhancement in image reconstruction.
- Implemented anisotropic diffusion method in C++ and GLSL.

Honors & Awards

ISBI 2015 NIH Traval Award.	2015
Guanghua Scholarship.	2010
Outstanding graduate Student Award, Sichuan University.	2010
Graduate Student Fellowship, Sichuan University.	2007-2010
Student Innovation Award, Sichuan University.	2005-2007
1st prize of China Undergraduate Mathematical Contest in Modeling.	2006
