RESEARCH INTERESTS

Image Analysis, Computer Vision, Machine Learning

EDUCATION

UNIVERSITY of NORTH CAROLINA at CHAPEL HILL, Chapel Hill, NC, USA

P.D. candidate in Computer Science since 08/2010

SICHUAN UNIVERSITY, Chengdu, Sichuan, China

Master of Science in Computer Science 09/2007-05/2010

SICHUAN UNIVERSITY, Chengdu, Sichuan, China

Bachelor of Engineering in Computer Science 09/2003-05/2007

RESEARCH EXPERIENCE

Deformable registration with built-in invariant to ane transformations 2010-2011
Research Assistant

Developed a deformable registration algorithm with built-in ane transformations, and applied this algorithm to the registration between uorescence microscopy and TEM images.

Energy based Crowd Motion Analysis 2009-2010
Research Assistant

Developed a energy based crowd motion analysis algorithm based on mutual information, and applied this algorithm to detect the crowd abnormal behaviors.

Super Resolution and Anisotropic Diusion for Ultrasound Speckle Reduction 2009
Research Assistant

Developed a fast and robust super-resolution method for intima reconstruction in medical ultrasound imaging, and applied anisotropic diusion to reduce speckle with edge enhance- ment during the image reconstruction.

GPU Framework for Anisotropic Diffusion 2008-2009
Research Assistant

Developed a novel method for motion estimation and visualization of cardiac ultrasound images. The motion vector elds are derived from an adaptive curve region based matching algorithm.

HONORS & AWARDS	Guanghua Scholarship, Sichuan University.	2009
	Graduate Student Fellowship 2009, Sichuan University.	2009
	Excellent undergraduate Student, Sichuan University.	2007
	Student Innovation Award (1st prize), Sichuan University.	2006
	1st prize of China Undergraduate Mathematical Contest in Modeling (CUMCM).	2006
PROFESSIONAL SKILLS	C/C++, Java, Python, Matlab, Windows, Linux, MacOS X
